

Aircraft Noise Impact Survey

As you know I have been working for some time on the effects of aircraft noise in the area and it is now time to run an up to date survey on the effects. Because of the situation at present, we are asking the questions in two sections, before and during the covid19 pandemic.

If you would be kind enough to fill in the questionnaire for your household and any other information you wish to give and return it in the pre-paid envelope provided.
